

Enabling Mission Critical Operations Through Mature Implementation

Nadya Bartol, Eric White, Stephanie Shankles, and Michelle Moss. *IAnewsletter*, Vol. 10, No. 2, Summer 2007.

From the first paragraph:

"Operations environments are growing increasingly complex as companies and agencies join the net-centric community, where architecture is collaborative and information access instantaneous and global. Led by the Department of Defense's (DoD) vision of Net-Centric operations and the demands of modern warfare, a community has formed in which warfighters and business and intelligence users can share knowledge on a secure and reliable network anywhere worldwide."
